Postgraduate Diploma 2010 Foundation Course in Syndrome Acupuncture & Chinese Medicine for Doctors/ Healthcare Professionals

Organised by:

The AcuMedic Foundation, (London) &
The Beijing University of Chinese Medicine (Beijing)

Accredited by:

The Chinese Medical Institute and Register (CMIR)

Learn Syndrome Acupuncture

- Mainstream acupuncture as practiced in China.
- This is a much broader and encompassing technique than Western trigger point acupuncture, that can be used to treat a wider spectrum of problems.
- This course is unmatched in expertise and flexibility and is extremely hands on, with patient demonstrations and clinical tuitions.

☐ Gain full accreditation to the CMIR (Chinese Medical Institute and Register) ensuring your placement on the highly respected register as a properly qualified acupuncturist

☐ Most comprehensive and well structured weekend courses leading to a postgraduate diploma

☐ Integrate syndrome acupuncture into your practice and learn a deeper holistic understanding of the human body

☐ Valuable hands-on clinical experience in mainstream acupuncture and Chinese medicine, allowing you to have an extra tool in treating your patients holistically

- Syndrome Differentiation
- Application of Syndrome Acupuncture and Chinese Medicine
- Introduction to Chinese Herbal Medicine and Acupuncture Equipment

What our students have said...

Dr F Nieuwoudt Medical Doctor

This course has made a huge difference in my clinical work in what I can offer my patients. My humble thanks to Prof. Mei, Prof. Chen and Dr Lily.

Dr Wendy Denning Medical Doctor

Excellent course – comprehensive and inclusive. What makes any course is the spirit and enthusiasm of the teachers and the course makers. It is hard to imagine more passionate and enthusiastic teachers. Thank you to all your hard efforts.

Dr Robert Trossel Medical Doctor

Excellent course which gives western trained doctors a good insight in eastern/Chinese Medicine and matches neuro-bio-energy diagnostic measuring devices quite accurately.

Sue Ng Nurse/Midwife

I have enjoyed this two year diploma part-time course. If I had known about this course earlier I would have done it in UK instead of China. This is my recommendation to friends and colleagues to pursue this course with AcuMedic in future.

Dr K Y Ng GP

I think acupuncture works together with Chinese medicine is more effective, which gives you a holistic approach with deep understanding of the treatment in comparing trigger point acupuncture that limited to treat pain without knowing why. I have enjoyed the course and found it stimulating & challenging. It has given me an extra tool in treating my patients.

Dr Pam Herbert GP Principal

I found all the lectures most encouraging and helpful. I found they found the way to help a western trained doctor understand the Chinese medicine approach very well. I have found understanding Chinese medicine and applying it to general practice has improved my clinical skills.

Nick Pare Chiropractor/Pharmacist

The course is taught by accredited team who seek to help the candidate reach a thorough understanding of Chinese acupuncture and herbal medicine in a logical and a stress free way. The complex subject was made easier by the enthusiasm of staff to teach and excellent clinical arrangement to study real patients and practice on each other. I wish CMIR every success in the future.

Dr B P Chohan GP

Very good course with excellent lecturers, teaching materials and clinical input. (I found) trigger-point acupuncture is limited to small problems such as pain and musculoskeletal disorders while Chinese syndrome acupuncture make diagnosis and well consider all factors of the patient conditions to offer a systematic therapeutic treatment.

Elaine Gavin Physiotherapist

Wonderful course with excellent course deliverance, spent many enjoyable weekends with friends in Camden. It was taught and required more effort than I had anticipated. Was it worth it? Absolutely!

Dr Barry Graham Medical Doctor

A complicated and formidable depth of knowledge has been presented successfully in a form which can be assimilated by pupils lacking the cultural understanding in which Chinese medicine is rooted. The clinical input was excellent. I do not think any other TCM courses could match the variety of patients presented.

David Lloyd Osteopath

Outstanding tutors because their knowledge is delivered with enthusiasm and passion. Ideal course for healthcare practitioners because time is not wasted repeating lectures in anatomy and physiology.

Dr C D Thenuwara GP

I have been practicing trigger-point acupuncture for many years. The two year diploma course has been a revelation for me and opened me up with a totally new world of medicine, looking at the totality of the patients and their disease pattern reflected in the syndrome diagnosis. Absolutely brilliantly organized and efficiently conducted course.

Mr Jonathan Tarr Acupuncturist / Shiatsu teacher

I have enjoyed studying with AcuMedic and feel that the depth of knowledge from all the teachers is excellent and they are happy and willing to pass this on.

Syndrome Acupuncture & Chinese Medicine

(Mainstream acupuncture as practised in China)
